BELKIN®

GOVERNMENT SOLUTIONS

Your partner for the public sector

BELKIN®

WHY BELKIN?

As a proven technology leader for more than 25 years, Belkin International, Inc., has enabled businesses and organizations in both the public and private sectors to leverage the latest technology to improve efficiency and performance. Belkin offers a robust and innovative product portfolio addressing the specific needs of government agencies and organizations.

Belkin's expanding line of TAA-compliant products offers solutions for desktop security, power protection, power conservation, and copper and fiber cabling. Utilizing innovative technology and intelligent product design, Belkin provides turnkey solutions for the federal government's most demanding requirements and environments.

QUALITY

Belkin products are designed, tested, and proven to perform in environments where reliability is critical.

SERVICE

A world-class service organization ensures that you can count on Belkin to support our products and customers alike, with dependable, responsive customer service.

INNOVATION

Belkin products continue to add value and technology features that users can leverage as technology changes.

GSA Schedule
Contract GS-35F-0085U

Belkin understands the unique needs of government agencies and organizations, and offers a product portfolio that addresses several critical categories.

Belkin products fulfill the following needs:

SECURITY SOLUTIONS

p. 4–5 **Secure KVM Switches**

Belkin enables you to establish convenient access to multiple sources of information while keeping them absolutely separate and secure.

ENERGY SOLUTIONS

p. 6–7 **Conserve Surge Protection**

Belkin helps eliminate standby power wasted at individual workstations, conserving resources and lowering utility costs.

INFRASTRUCTURE SOLUTIONS

p. 8–9 **Cables**

Belkin is the clear market-share leader you've come to rely on for consistent, top-quality performance.

OTHER TAA SOLUTIONS

p. 10–11 **LCD Consoles, KVM Switches, Surge Protection, Racks and Enclosures**

Belkin's wide range of server-room products are designed to meet a multitude of constantly evolving IT requirements.

OMNIVIEW® SECURE KVM SOLUTIONS

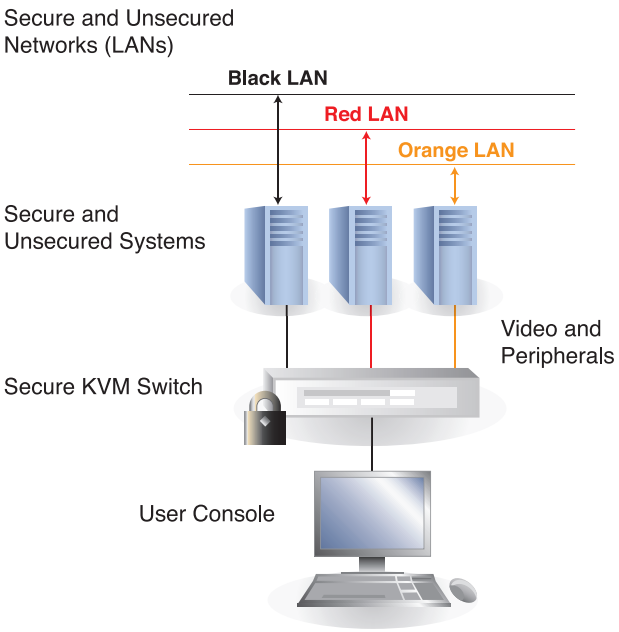
Belkin OmniView Secure KVM Switches provide secure access to information at different security levels from a single user console. Switch quickly and easily between multiple PCs and networks using a single keyboard, monitor, and mouse. Dedicated processors physically isolate data on one system from the next, preventing data transfer between security levels. With broad support for all major platforms and brands, you can rely on Belkin for compatibility with existing and future hardware.

DVI-D SECURE KVM SWITCH

Belkin's Secure Digital (DVI-D) KVM Switches provide high-speed, high-resolution support for larger monitors, peripheral devices, and the latest technologies. Securely connect a wide variety of peripheral devices—including audio equipment, today's larger displays, and more—and switch quickly and safely between multiple PCs and networks with a single keyboard, monitor, and mouse, all while exceeding NIAP security requirements.

DVI-D Secure
4-Port USB KVM Switch
Part Number F1DN104D

Also available in VGA models



KEY FEATURES

SECURITY

Keep sensitive sources of information compartmentalized and secure with absolute confidence. The Belkin Secure KVM solution is certified by the National Information Assurance Partnership (NIAP), validated to the Common Criteria Evaluation Assurance Level 4 (EAL4+), and augmented with ALC_FLR.3 to meet stringent security requirements.

RELIABILITY

Place your absolute trust in a proven solution from an industry leader. Belkin Secure KVM products have been rated for a mean time between failures (MTBF) of 450,000 hours—more than 50 years! High-grade components and manufacturing processes ensure reliability throughout the life of your product.

COMPATIBILITY

Expect broad flexibility with a Secure KVM solution that's designed and tested to work seamlessly with multiple computer platforms, operating systems, and input devices.

ROBUST SECURITY

OmniView Secure KVM Switches *go beyond* established testing criteria and certifications to ensure the highest levels of security and reliability.

DIRECT-SOLDER CIRCUITS

All OmniView Secure KVM Switches incorporate direct-solder circuits to ensure that components are permanently in place and are not subject to removal or replacement. Because components are hardwired, any tampering would be both difficult and evident on examination.

ONE-TIME PROM (OTP)

OmniView Secure KVM Switches utilize a one-time PROM to prevent tampering with the code after installation. One-time PROMs defeat attempts to modify switch functions and operation, and assure customers that the factory defaults and functionality will remain intact according to strict specifications.

ISOLATED PORT PATH

OmniView Secure KVM Switch ports maintain physical and logical separation, ensuring that information for each single system is separated from every other system.

NO BUFFERED DATA

OmniView Secure KVM Switches do not utilize data-buffering capabilities, thereby mitigating susceptibility to snooping, capture, or inadvertent transfer of secure data to another connected network or computing system.

EAL4+ RATING

The Evaluation Assurance Level 4 (EAL4+) rating assures users that KVM Switches have been evaluated and validated with certain levels of security. EAL4+ is currently the highest rating for any commercially available KVM Switch.

DVI-D Secure
4-Port USB KVM Switch

Part Number F1DN104D

COMPATIBILITY AND FLEXIBILITY

OmniView Secure KVM Switches are compatible with a wide range of computer platforms and operating systems, including Dell®, HP®, IBM®, Mac®, Linux®, and more.

LEGACY USB DEVICE SUPPORT

Comprehensive USB peripheral capabilities ensure that the full breadth of keyboards, mice, and other input devices are supported, as well as macros and other commands.

FORWARD-COMPATIBILITY ASSURANCE

Belkin products are designed with an eye toward current and future technologies to enable continued support as changes occur in applications and environments.

CAC COMPLIANCE

Common Access Card (CAC) support allows users to utilize any third-party CAC reader keyboards for user authentication at the workstation.

THIN CLIENT COMPATIBILITY

OmniView Secure KVM Switches are tested across multiple platforms. Users can be confident in attaching and managing thin client solutions.

GRAPHICS TABLET AND TOUCH-SCREEN SUPPORT

Full support for touch-screen, tablet, and other input devices enables users to leverage the latest in tactical, graphically intensive applications.

Common Criteria

CONSERVE SURGE SOLUTIONS

Nearly 50 percent of IT energy consumption occurs *outside* the data center. Belkin Conserve Surge products represent cost-saving solutions that help reduce energy wasted by office electronics right at the workstation. Belkin Conserve Surge products enable organizations to control wasted energy costs while engaging their employees in conservation efforts.

CONSERVE SURGE WITH TIMER

The Conserve Surge with Timer features a convenient one-touch desktop button and automatic timer to power down outlets after 11 hours of use or at the end of the work day.

- Two “always-on” outlets for devices that need constant power, like computers
- Six “auto-off” outlets for printers, desk lights, monitors, etc.
- Blinking LED on desktop timer button warns users of impending shut down
- Simple override—if user wants outlets to remain powered on, they simply press the button again
- 6-foot AC power cable

Part Number CNS08-T-06TAA, Available Fall 2010

KEY FEATURES

PROGRESSIVE

Conserve Surge empowers employees to participate in energy savings and cost reduction right at their workstations.

AUTOMATIC

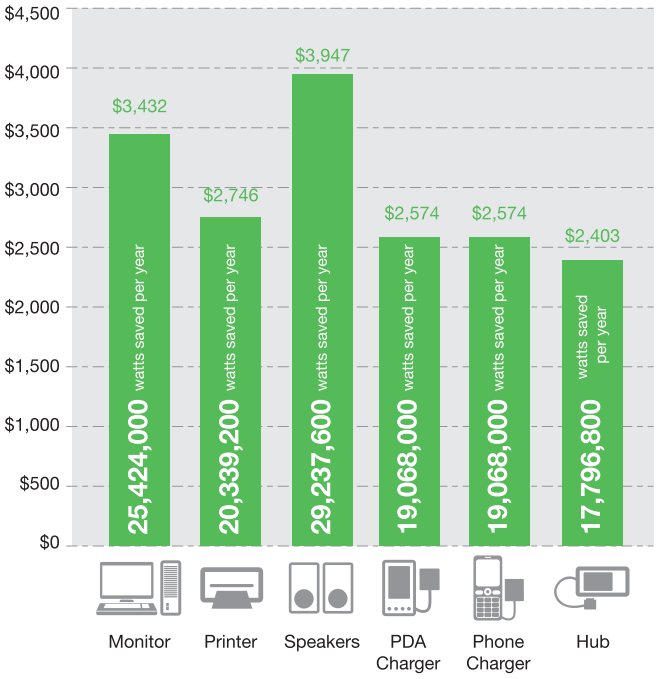
With its 11-hour timer, Conserve Surge turns off your office electronics automatically at the end of the work day or at the touch of a button.

INTUITIVE

Designed with office environments in mind, the Conserve Surge with Timer is both easy to install and non-intrusive to the workspace.

ENERGY SAVINGS

The Conserve Surge with Timer can help organizations conserve energy and lower utility costs by controlling standby power at the workstation. When one company in Southern California purchased 2,000 products for their workstation electronics, the Conserve Surge with Timer helped them recover their investment by reducing the expense of standby power. To learn more about saving money and energy, visit www.belkin.com/energy/conserve.



Standby power: ECOS Field Report for California Energy Commission

ASSUMPTIONS

Based on 2,000 office workstations	
Hours reduced per week	113
Hours reduced per annual work holiday	480
Hours reduced per year	6,356

Standby power is eliminated after-hours 5 days per week, and on weekends and holidays.

Computer power is not included, as computers are connected to always-on outlets.

OTHER TAA SOLUTIONS

Belkin's comprehensive TAA product line ensures high-quality solutions to satisfy a broad range of government IT requirements, now and in the future. All of our server room, power protection, and network security products are made in the United States and are trade compliant for government applications.

LCD CONSOLES

Belkin offers a full lineup of TAA-compliant LCD rack consoles to meet your technical requirements and IT budget. With efficient use of interior space, improved cable management, and integrated KVM Switches, Belkin solutions provide easy at-the-rack access as well as security and durability in the data center.

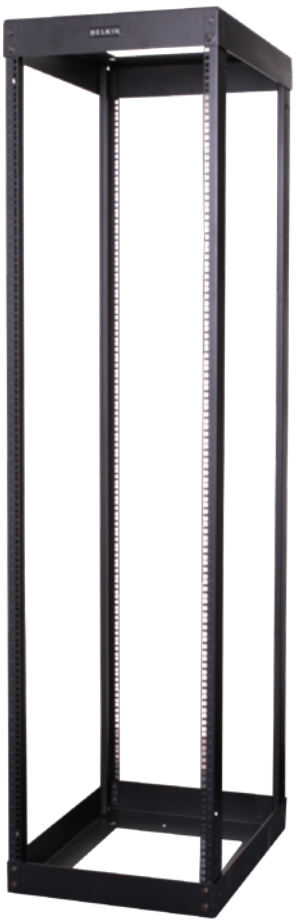
Key Features

- KVM and console in a consolidated 1U form factor for optimum use of rack space
- Premium 17-inch color display with a tempered-glass overlay
- Dual-glide rails for deploying the keyboard and LCD panel separately
- Two-year warranty and free technical support

LCD Rack Console
Part Number F1DC101C-US

RACKS AND ENCLOSURES

When protecting your hardware investment is paramount, Belkin's rack and enclosure offerings accommodate nearly any application. Wall-mount, open-frame, and premium enclosures are designed and engineered to offer robust load capacity, a variety of cable management options, and universal compatibility with all major network and server hardware.



Four-Post Rack (42U)
Part Number RK4000

CAT5 KVM SOLUTIONS

Belkin OmniView CAT5 KVM switching solutions meet the needs of IT professionals in a variety of environments. They reduce cable clutter, provide reliable connectivity, and allow system administrators to manage multi-platform servers at distances up to 100 feet from the switch. Backed by Belkin's tradition of innovation and quality, OmniView CAT5 KVM Switches provide superb reliability and a comprehensive feature set.

Key Features

- Intelligent keyboard-mouse connectivity to help prevent server downtime
- Ideal for mixed server environments
- Quick, easy, clutter-free installation
- Simple hot-key and password-protected OSD switching options
- Supports up to 256 separate systems
- Compact 1U footprint, inside or outside the rack
- Three-year warranty and free technical support

OmniView CAT5 KVM Switch
Part Number F1DP116A-US

SURGE PROTECTION

Belkin surge protectors provide premium power protection for office environments. Advanced design elements, top-quality construction, and superior circuitry and components ensure complete protection from surges, spikes, and other electrical abnormalities. Our TAA surge protection products are backed by Belkin's Lifetime Product and Connected Equipment Warranties. Belkin surge protectors feature a slim, sleek design that complements today's modern electronic devices.

Key Features

- 720-joule energy rating for maximum protection of sensitive electronic devices
- Six surge-protected outlets for complete, three-line AC protection
- 6-foot, 14-gauge, heavy-duty power cord for optimal, safe AC power
- EMI/RFI noise filters up to 43 dB reduction
- Lifetime Product Warranty
- $25,000 Connected Equipment Warranty
